in this groundbreaking title a r oppenheimer tells how the irish republican army became the most adept and experienced insurgency group the world has ever seen through their bombing expertise and how after generations of conflict it all came to an end the book is a comprehensive account of more than 150 years of irish republican strategic tactical and operational details and an analysis of the ira s mission doctrine targeting and acquisition of weapons and explosives as a leading expert on non conventional weapons and explosives oppenheimer vividly presents the story behind the bombs those who built and deployed them those who had to deal with and dismantle them and those who suffered or died from them he analyses where how and why the ira s 19 000 bombs were built targeted and deployed and explores what the ira was hoping to accomplish in its unrivaled campaign of violence and insurgency through covert acquisition training intelligence and counter intelligence beginning with the fenian dynamiters in the second half of the nineteenth century oppenheimer fully describes and assesses the impact of the pre 1970s bombing campaigns in northern ireland and england and the evolution of strategies and tactics during the troubles he concludes with the decommissioning of an arsenal big enough to arm several battalions which included an entire home crafted missile system an unsurpassed range of improvised explosive devices ieds and enough explosives to blow up several urban centres the author scrutinises the level of deadly improvisation that became the hallmark of the provisional ira s expertise and the ingenuity in its pioneering ied timing delay and disguise technologies and follows the arms race it carried on with the british army and security services in a long war of mutual assured disruption he also provides an insight into the bombing equipment and guns in the vast ira inventory held at irish police hq in dublin

could the allies have prevented the deaths of tens of thousands of holocaust victims inspired by a conference held to mark the opening of the us holocaust memorial museum this book brings together the key contributions to this debate

a study of nuclear warfare s key role in triggering the post world war ii confrontation between the us and the ussr after a devastating world war culminating in the obliteration of hiroshima and nagasaki it was clear that the united states and the soviet union had to establish a cooperative order if the planet was to escape an atomic world war iii in this provocative study campbell craig and sergey radchenko show how the atomic bomb pushed the united states and the soviet union not toward cooperation but toward deep bipolar confrontation joseph stalin sure that the americans meant to deploy their new weapon against russia and defeat socialism would stop at nothing to build his own bomb harry truman initially willing to consider cooperation discovered that its pursuit would mean political suicide especially when news of soviet atomic spies reached the public both superpowers moreover discerned a new reality of the atomic age now cooperation must be total the dangers posed by the bomb meant that intermediate measures of international cooperation would protect no one yet no two nations in history were less prepared to pursue total cooperation than were the united

states and the soviet union the logic of the bomb pointed them toward immediate cold war sprightly and well argued the complicated history of how the bomb influenced the start of the war has never been explored so well lloyd gardner rutgers university an outstanding new interpretation of the origins of the cold war that gives equal weight to american and soviet perspectives on the conflict that shaped the contemporary world geoffrey roberts author of stalin s wars

the ramifications of the manhattan project are still with us to this day the atomic bombs that came out of it brought an end to the war in the pacific but at a heavy loss of life in japan and the opening of a pandora s box that has tested international relations this book traces the history of the manhattan project from the first glimmerings of the possibility of such a catastrophic weapon to the aftermath of the bombings of hiroshima and nagasaki it profiles the architects of the bomb and how they tried to reconcile their personal feelings with their ambition as scientists it looks at the role of the politicians and it includes first hand accounts of those who experienced the effects of the bombings

as the might and capabilities of american airpower have grown during the last 60 years so has the controversy about its use in the intentional and indiscriminate wartime bombardment of civilians in bombs cities and civilians conrad crane maintains that for the most part american airmen in world war ii remained committed to precision bombing doctrine instead of attacking densely populated urban areas simply to erode civilian morale army air forces adhered to a policy that emphasised targeting key industrial and military sites he demonstates that while the british germans and japanese routinely conducted indiscriminate aerial bombardment of enemy cities american airmen consistently stayed with daylight raids against carefully selected targets especially in europe daytime precision missions were usually far more dangerous than night area attacks but such army air forces tactics increased bombing efficiency and also reduced the risk of civilian casualties
